NIELIT Guwahati

PROFILE

Full-Stack Developer experienced in building scalable, database-driven applications and centralized management portals. Proficient in designing backend APIs, managing cloud-based databases, and integrating automated workflows and payment gateways. Passionate about digital transformation and eager to contribute to enterprise IT solutions.

TECHNICAL PROJECTS

FoodExpress & Super Admin Portal | Full-Stack Developer

- Architected a multi-tier ecosystem including a customer app, restaurant dashboard, and ReactJS Super Admin Portal.
- Designed a scalable Supabase database architecture that includes role-based access, integration for restaurant partners, and features for menu management.

PG Finding Platform | Full-Stack Developer

- Built a localized web portal with secure authentication and dynamic property databases to connect students with housing.

MessMate - Hostel Management System

- Developed a resource management platform to automate daily administrative and financial workflows for hostels.
- Built secure, database-driven modules to track student records, attendance, and mess fee lifecycles.
